"When choosing the design, decide whether you're a round, square or rectangle kind of person and make it consistent throughout your bathroom."

Regina Veal | Tradelink Berrimah

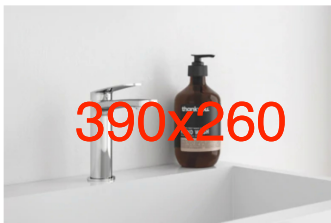

The long and short of bathroom tapware!

One of the first things our showroom consultants ask is whether you're a round or square person, or a bit of both. Decide on the look you like and you're off to a good start.

Then we get to the technical part. What will the tap be used for – bath, shower or basin? Who will be using it – kids, grandparents? How does it need to be installed – to fit existing plumbing? What special features would you like – such as water saving?

It's important to think about these things because function and compatibility will dictate your options and choices. We don't want you to walk into your beautiful new bathroom and find your bath spout is too short or your vanity mixer too long.

Bathroom tapware product range

We have a huge range of tapware to suit the mood and style of your bathroom. From the classic crosshead handle to contemporary mixers, we've got you covered – you might even say, we shower you with choices.

One of the most frequent questions we're asked is what colours are available. So, we make sure we offer a full range of all the traditional and trending tapware colours. You'll be sure to find a fitting that fits your bathroom and that you will love the look, touch and feel of

Bathroom tapware product range

145x105

Three-piece tapware

This is when you have a spout with two separate taps for hot and cold. It's a heritage style that's perfect for older homes, but you can also get great contemporary options as well.

120x95

Basin mixer tapware

If you're after a more contemporary look and simple use, then a mixer could be the perfect fit. Mixers seamlessly blend hot and cold water. You control the temperature and pressure via a single, easy-to-move handle.

120x95

Can I install it myself?

We've seen it time and time again: what should take five minutes takes five days! Some changeouts or installations are straightforward – like swapping some shower roses – but others are fiddly. DIY runs the risk of voiding your warranty. We always recommend you get a licenced plumber to fit your tapware.

Can it be retrofitted?

Do you have it in stock?

What colour can I get it in?
